Continuation of 10. Other (including any explanation in support of the above items): According to 37 CFR 41.37 (V), a concise explanation of the subject matter defined in each of the independent claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 112, sixth paragraph, must be identified and the structure, material, or acts described in the specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

With regard to independent claims 34 and 39, appellant simply stated that these claims "represent different classes to claim 13". It appears that these claims are system/apparatus claims. Accordingly, the structure and material of these claims must be identified in the specification, with reference to the specification by page and line number, and to the drawing, if any, by reference characters. The same argument applies to independent claim 49.

An entire new brief need not, and should not, be filed. Rather, a paper providing a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v) will suffice. Failure to timely respond to the Office 's requirement will result in dismissal of the appeal.
